

PassiveXRP

Whitepaper v1.1

contract:

0x075fc0de2a06ccbc1f8bf1496c2a787abbd87562

passivexrp.com

Audience

This whitepaper aims to introduce the potential investors to the concepts of PassiveXRP below as well as provide an in-depth analysis of the project's core mechanics.

It is designed to provide investors with the most rewarding investment experience possible. Its goal is to be the most sophisticated reward mechanism in the market.

Tokenomics

This is the first step in the evolution of the Binance Smart Chain (BSC) coin, which is a distributed reward system. Unlike token reflections, rewards are distributed in XRP.

PassiveXRP Tokenomics:

- Token supply of 100,000,000,000,000 PassiveXRP
- 5% Buy and Sale Tax*:
 - 3% XRP is redistributed among holders
 - 1% is used to increase the liquidity pool.
 - 1% is allocated towards funding the marketing wallet.

NOTE: you must hold 200,000,000 or more PassiveXRP tokens to be eligible for the XRP dividends.

When buying or holding a percentage of supply, a dividend tracker automatically calculates and distributes dividends among all holders.

Tokenomics

5% Transaction TAX

EVERY TRANSACTION HAS 5% TAX DIVIDED IN
TO THE FOLLOWING

3% XRP REFLECTION

HOLD YOUR COINS, AND YOU
WILL AUTOMATICALLY BE
REWARDED

PLEASE ADD XRP BEP20 TO
YOUR WALLET

1% MARKETING WALLET

WE EXPECT HIGH VOLUME
OF TRADES AND SLOW
GROW INSTEAD OF
OVERCHARGING FOR EACH
TRANSACTION

1% LIQUIDITY POOL

AUTOMATICALLY ADDED TO
THE LIQUIDITY POOL
TO ASSURE FAST AND
SECURE TRADING

Dividend Mechanism

Every order is subject to a transaction fee, after which the tokens are swapped in real-time for XRP and added to a POOL.

The amount of XRP holder receive is determined by the percentage of supply they own and the size of the current pool.

<https://bscscan.com/address/0xb022fa07b231e2572bb892551e66515f0db44836>

The mechanism simply encourages investors by allowing them to earn dividends while holding tokens.

The redistribution is based on the current token balance and the number of holders.

Dividend Mechanism

- The contract automatically adds dividend tracker to each purchase.
- The contract keeps track of all token holders
- The gains from the XRP contract will be distributed evenly to token holders in proportion to their holdings.
